RE: DOGM PERMIT APPLICATION

Following your visit to the Larson Limestone Quarry on October 30, 1995 we contacted Dr. Patrick Collins of Mt. Nebo Scientific, Inc. and requested that he review the permit application requirements and determine the type of work and associated costs needed to comply with DOGM regulations.

We have since received a proposed Scope-of-Work from Mt. Nebo and it is our intention to hire them as our consultants to prepare the application. According to Mt. Nebo's schedule the time frame for completing the necessary work is approximately six months and we plan to have them begin as soon after the first of the year as possible.
